

Dancing Rice

Science Experiment

Method

1. Stretch the cling film over the open end of the pot or tube, to make a drum.
2. Hold the cling film in place with the elastic band.
3. Place the drum in front of a speaker.
4. Put 10 grains of rice on to the cling film.
5. Turn on the speaker and play some music.
6. Watch the grains of rice dance.

You will need:

Rice

Cling film

Elastic band

Plastic or cardboard pot or tube (e.g. stacked crisps or noodles pot)

Speaker

Music
